Jon and Jack, this is an FYI

Dave,

I just got a "Notice of Implementation of Contingency Plan" [40 CFR 265.56(i)] from Flint Hills Resources, Inc, in Alaska (AKD000850701). Flint Hills is a refinery in North Pole, AK.

The incident report indicates that on June 20 and 22 there was a fire and a re-ignition of a fire inside a roll-off container; approximately 35 groundwater filter container iron sulfides was the material involved.

The report indicates that the groundwater filters were placed in 5-55 gallon steel drums and were labeled as D001. They indicate the containers will be sent to PSC-Kent.

Thought you/your staff would be interested in knowing about a waste heading your way that has a history of spontaneous combustion.

If you want more information on the incident you could call Serena Lewellyn @ 907-490-6217

Cheryl
